## 1. Library Automation (ILMS)

RHSCOE Central Library is (partially automated) using commercial software **Soul 2.0 (Software for University Libraries 2.0)** from 2013 onwards. Software for University Libraries (SOUL) is state-of-the-art integrated library management software designed and developed by the INFLIBNET Centre based on requirements of college and university libraries. It is user-friendly software developed to work under client-server environment for smooth function of various library functions such as cataloguing, circulation, serials control and more. Library is automated with **barcode technology** for circulation and patron's entry. Library has excellent infrastructure to meet its requirements, most of the library operation are computerized using upgraded software of version Soul 2.0.14. Library collection and member status can be browsed/ searched on intranet using SOUL 2.0 OPAC and also user can access to library collection through Web-Opac from anywhere.
